Resnick Adventures In Stochastic Processes Solution

stochastic processes: 1. If T consists of just one element (called, say, 1), then a stochastic process reduces to just one random variable $X_1: \Omega \rightarrow \mathbb{R}$. So, the concept of a stochastic process includes the concept of a random variable as a special case. 2. If $T = \{1, \dots, n\}$ is a finite set with n elements, then a stochastic process reduces to a
