As it was believed that evil spirits would attack a woman while she was giving birth, many ancient societies had a deity / several deities in their pantheon who would be given the task of protecting women in labor. The ancient Egyptians, for example, had two deities in charge of childbirth. One of them was Bes, the ferocious-looking dwarf god. The other Tawaret, who is portrayed as a bipedal female hippopotamus with feline attributes, pendulous breasts, and the back of a crocodile.

Childbirth and obstetrics in Classical Antiquity were studied by the physicians of ancient Greece and Rome. Their ideas and practices during this time endured in Western medicine for centuries and many themes are seen in modern women's health. Gynecology and obstetrics were originally studied and taught mainly by midwives in the ancient world, but eventually scholarly physicians of both sexes became involved as well. Obstetrics is traditionally defined as the surgical specialty dealing with the

These were related to the act of loosening the belt during birth, perhaps mimicking the act of loosening the womb. Of all the belt clasps found in Ancient Greece, while some were dedicated by men for male deities for other reasons, 84% were dedicated to female deities. At the site of Argos alone, there are roughly 700-800 dress pins that survive. Other common dedications were keys before the birth in the hope of an easy delivery and amulets worn during the birth to help with pain.
