different issues relating

to intensive and acute

cardiovascular care. The

textbook is addressed to

all those involved in

intensive and acute

cardiac care, from

cardiologists to

emergency physicians

and healthcare

professionals. The

File Type PDF

Chapter 19

chapters cover the various acute cardiovascular diseases that need high quality intensive treatment, but also organisational issues, cooperation among professionals, and interaction with other specialities in medicine. The largest section of the textbook is devoted to non-cardiac disease which

File Type PDF

Chapter 19

could acutely involve the cardiovascular system. Other noteworthy chapters are on ethical issues - which are so important in acute cardiac care, such as patient safety, donor organ management and palliative care. A unique characteristic of the textbook is the presence of a whole section devoted to biomarkers,

File Type PDF

which underline the growing importance of laboratory medicine in the field of intensive and acute cardiac care.

A particular asset of the textbook is the digital version available on Oxford Medicine Online, which has additional online features including an extra chapter on lung ultrasound and many
