Graphing Translations of Simple Rational Functions To graph a rational function of the form $y = a \left(\frac{1}{x-h} + k \right)$, follow these steps: Step 1 Draw the asymptotes $x = h$ and $y = k$. Step 2 Plot points to the left and to the right of the vertical asymptote. Step 3 Draw the two branches of the hyperbola so that they pass through the plotted points and approach the

Graphing Rational Functions Worksheet 2
Recall from Section 1.2 that an even function is symmetric with respect to the y-axis, and an odd function is symmetric with respect to the origin. This can sometimes save time in graphing rational functions. If a function is even or odd, then half of the function can be graphed, and the rest can be graphed using symmetry.
