Disease Control Priorities, Third Edition : Volume 2. Reproductive, Maternal, Newborn, and Child Health

This volume presents alphabetically arranged articles dealing with all kinds of diseases and disorders, from jaundice to rubella.

Written for social workers by a social worker, Mental Disorders, Medications, and Clinical Social Work discusses the etiology, epidemiology, assessment, and intervention planning for common mental disorders. Looking at disorders from an ecosystems perspective, Austrian goes beyond a linear classification approach and DSM-IV-TR categories and encourages social workers to analyze the internal and external environmental factors that contribute to a disorder's development. Austrian's discussion of effective intervention(s) for a particular client also stresses the importance of working with families in treating disorders. In addition to information on new medications, biochemical data on the causes of disease, and diagnostic tests, the revised third edition discusses therapies such as motivational interviewing, cognitive-behavioral, interpersonal, and dialectic.

This basic pathophysiology textbook for medical assisting and other short programmes is organized by body system, under which are categories of diseases. Each disease state is formatted by signs and symptoms, aetiology, diagnosis and treatment

Infectious diseases are the leading cause of death globally, particularly among children and young adults. The spread of new pathogens and the threat of antimicrobial resistance pose particular challenges in combating these diseases. Major Infectious Diseases identifies feasible, cost-effective packages of interventions and strategies across delivery platforms to prevent and treat HIV/AIDS, other sexually transmitted infections, tuberculosis, malaria, adult febrile illness, viral hepatitis, and neglected tropical diseases. The volume emphasizes the need to effectively address emerging antimicrobial resistance, strengthen health systems, and increase access to care. The attainable goals are to reduce incidence, develop innovative approaches, and optimize existing tools in resource-constrained settings.

The New Public Health has established itself as a solid textbook throughout the world. Translated into 7 languages, this work distinguishes itself from other public health textbooks, which are either highly locally oriented or, if international, lack the specificity of local issues relevant to students' understanding of applied public health in their own setting. This 3e provides a unified approach to public health appropriate for all masters' level students and practitioners—specifically for courses in MPH programs, community health and preventive medicine programs, community health education programs, and community health nursing programs, as well as programs for other medical professionals such as pharmacy, physiotherapy, and other public health courses. Changes in infectious and chronic disease epidemiology including vaccines, health promotion, human resources for health and health technology Lessons from H1N1, pandemic threats, disease eradication, nutritional health Trends of health systems and reforms and consequences of current economic crisis for health Public health law, ethics, scientific d health technology advances and assessment Global Health environment, Millennium Development Goals and international NGOs

Isolated regions of the world are often at the forefront of emerging diseases. To be effective in

disease prevention and control, they require basic resources for field sample collection and testing. Technical support for field extension staff, and the availability of reliable diagnostic testing facilities, are also vital to ensure sustainable livelihoods for subsistence farmers. This technical handbook aims to provide an easy to follow overview of the basic laboratory techniques and sample collection guidelines. The third edition provides the reader with a summary of basic diagnostic procedures and sample submission guidelines.

Animal Models for the Study of Human Disease identifies important animal models and assesses the advantages and disadvantages of each model for the study of human disease. The first section addresses how to locate resources, animal alternatives, animal ethics and related issues, much needed information for researchers across the biological sciences and biomedicine. The next sections of the work offers models for disease-oriented topics, including cardiac and pulmonary diseases, aging, infectious diseases, obesity, diabetes, neurological diseases, joint diseases, visual disorders, cancer, hypertension, genetic diseases, and diseases of abuse. Organized by disease orientation for ease of searchability Provides information on locating resources, animal alternatives and animal ethics Covers a broad range of animal models used in research for human disease

Check with the seller before completing your purchase. For courses in pathophysiology. This package includes MyLab Nursing. A human approach to pathophysiology, with an eye on promoting health Pathophysiology: Concepts of Human Disease focuses on the human aspect of pathophysiology, acknowledging that diseases, disorders, and syndromes occur not in a vacuum, but in people -- across the lifespan. Drawing on the health stories of real individuals, the authors provide the latest information in pathophysiology that is relevant to clinical practice, while empowering students with competencies that endure throughout a nursing career. Throughout the text, the approach to pathophysiology reflects a shift of focus in healthcare from understanding diseases in their later stages to understanding risk factors and the interventions that can maintain good health and slow progression of disease in humans. Reach every student by pairing this text with MyLab Nursing MyLab(TM) is the teaching and learning platform that empowers you to reach every student. By combining trusted author content with digital tools and a flexible platform, MyLab personalizes the learning experience and improves results for each student. MyLab Nursing helps students master key concepts, prepare for success on the NCLEX-RN(R) exam, and develop clinical reasoning skills. 013487434X / 9780134874340 Pathophysiology: Concepts of Human Disease Plus MyNursingLab -- Access Card Package, 1/e Package consists of: 0133414787 / 9780133414783 Pathophysiology: Concepts of Human Disease, 1/e 0134746783 / 9780134746784 MyNursingLab with Pearson eText 2.0- Access Card - for Pathophysiology, 1/e
