## Online Library Icao Standard Phraseology A Quick Reference Guide For

The studies presented in this volume focus on two distinct but related areas of specialized communication professional and academic settings, resting on an anti-essentialist notion of identity as a phenomenon that emerges from the dialectic between individual and society. The authors start from a detailed analysis of discourse practices as evidenced in texts, their production and the professional performance patterns which underlie such practices, and explore the way the actors, roles and identities are constructed in language and discourse. In particular, by highlighting discursive attitudes and aptitudes, they underscore the need to understand discourse in light of norms of professional responsibility, showing that not only do professionals and academics use discourse to create self-identity, but they also use identity

# Online Library Icao Standard Phraseology A Quick Reference Guide For

constructed through discourse to influence society.

Communication in aviation is a challenge for pilots, air traffic controllers, aviation personnel and, consequently, for professionals who are in charge of teaching and assessing the language used in the aeronautical context. The growing demand in the market along with constant commitment with safer skies have posed the need for more and more studies that try to contribute to this issue, especially those which attempt to describe and explain the use of English in aviation. The book brings introductory information about teaching Aviation English regarding general guidelines for teachers in addition to data from academic research conducted in the area. Specific studies based on the analysis of aeronautical

# Online Library Icao Standard Phraseology A Quick Reference Guide For

accidents and incidents, interviews with pilots and ATCOs and corpus research show that the use of the English language in aviation should be further addressed.

This volume analyzes real in-flight communications to explain the dynamics of knowledge construction. With the use of a grounded theory approach, real-life scenarios for in-depth interviews with aviation informants were developed and analyzed using discourse analysis. The study revealed aspects of tacit knowledge and expertise behavior that

develop in mission-critical environments. Among the findings, the author discovered:

- Silence is an interactional element and a substantial contributing factor to both completed flights and aviation incidents/accidents
- Hesitation is an early reaction when situational awareness is lacking
- The aviation sub-cultures contain several distinct micro-cultures which affect professional responsibility and decision making in micro-environments
- Human errors should be acknowledged, discussed and repaired by all actors of the flight model
- Non-verbal communication in institutional settings and mediated environments is instrumental to safe and efficient operations

The results suggest fruitful applications of theory to explore how knowledge is generated in highly structured, high-risk organizational environments, such as hospitals, nuclear

plants, battlefields and crisis and disaster locations.

Katerinakis explains the emergent knowledge elements in communication command with messages "spoken-heard-understood-applied," from multiple stakeholders... The interplay of theory and real-flight examples, with key interlocutors, creates a valuable narrative both for the expert reader and the lay-person interested in the insights of hospitals, nuclear plants, battlefields, safety and rescue systems, and crisis and disaster locations. Ilias

Panagopoulos, PhD Command Fighter Pilot, Col (Ret) Senior Trainer, Joint Aviation Authorities (JAA) Training Organisation Safety Manager, NATO Airlift Management Programme In this path-breaking work, Theodore Katerinakis brings the study of human communication to the airplane cockpit as a

# Online Library Icao Standard Phraseology A Quick Reference Guide For

knowledge environment. Toward that end, drawing on his own experience with the Air Force and Aviation Authorities and interviews with flight controllers and scores of pilots, Katerinakis both builds on moves beyond human factors research and ecological psychology... It is a work of theoretical value across disciplines and organizational settings and of practical importance as well. His lively narrative adds to translational research by translating knowledge or evidence into action in mission-critical systems. Douglas V. Porpora, PhD Professor of Sociology & Director Communication, Culture and Media Drexel University
