The murder of Richard Collins III occurred on May 20, 2017, while Collins and friends waited for an Uber to arrive around 3 AM near Montgomery Hall on the University of Maryland, College Park campus. 22-year old UMD senior Sean Urbanski emerged from a wooded area, screamed at the group, and proceeded to stab Collins, who later died of his wounds. Due to Urbanski's online involvement with far-right politics and the alt-right, many condemned Urbanski's actions as a hate crime. The FBI declined to

"When a pretty student is found dead in her room at a private Oxford college, everyone assumes it is an accidental drug overdose." -- Book Jacket.

FINALIST FOR THE J. ANTHONY LUKAS BOOK PRIZE NATIONAL BESTSELLER Named One of The Best Books of 2020 by NPR's Fresh Air * Publishers Weekly * Marie Claire * Redbook * Vogue * Kirkus Reviews * Book Riot * Bustle A Recommended Book by The New York Times * The Washington Post * Publisher's Weekly * Kirkus Reviews* Booklist * The Boston Globe * Goodreads * Buzzfeed * Town & Country * Refinery29 * BookRiot * CrimeReads * Glamour * Popsugar * PureWow * Shondaland Dive into a "tour de force of investigative reporting" (Ron Chernow): a "searching, atmospheric and ultimately entrancing" (Patrick Radden Keefe) true crime narrative of an unsolved 1969 murder at Harvard and an "exhilarating and seductive" (Ariel Levy) narrative of obsession and love for a girl who dreamt of rising among men. You have to remember, he reminded me, that Harvard is older than the U.S. government. You have to remember because Harvard doesn't let you forget. 1969: the height of counterculture and the year universities would seek to curb the unruly spectacle of student protest; the winter that Harvard University would begin the tumultuous process of merging with Radcliffe, its all-female sister school; and the year that Jane Britton, an ambitious twenty-three-year-old graduate student in Harvard's Anthropology Department and daughter of Radcliffe Vice President J. Boyd Britton, would be found bludgeoned to death in her Cambridge, Massachusetts apartment. Forty years later, Becky Cooper a curious undergrad, will hear the first whispers of the story. In the first telling the body was nameless. The story was this: a Harvard student had had an affair with her professor, and the professor had murdered her in the Peabody Museum of Archaeology and Ethnology because she'd threatened to talk about the affair. Though the rumor proves false, the story that unfolds, one that Cooper will follow for ten years, is even more complex: a tale of gender inequality in academia, a 'cowboy culture' among empowered male elites, the silencing effect of institutions, and our compulsion to rewrite the stories of female victims. We Keep the Dead Close is a memoir of mirrors, misogyny, and murder. It is at once a rumination on the violence and oppression that rules our revered institutions, a ghost story reflecting one young woman's past onto another's present, and a love story for a girl who was lost to history.

A premier historian penetrates the fog of corruption and cover-up still surrounding the murder of a Stanford University founder to establish who did it, how, and why. In 1885 Jane and Leland Stanford cofounded a university to honor their recently deceased young son. After her husband's death in 1893, Jane Stanford, a devoted spiritualist who expected the university to inculcate her values, steered Stanford into eccentricity and public controversy for more than a decade. In 1905 she was murdered in Hawaii, a victim, according to the Honolulu coroner's jury, of strychnine poisoning. With her vast fortune the university's lifeline, the Stanford president and his allies quickly sought to foreclose challenges to her bequests by constructing a story of death by natural causes. The cover-up gained traction in the murky labyrinths of power, wealth, and corruption of Gilded Age San Francisco. The murderer

walked. Deftly sifting the scattered evidence and conflicting stories of suspects and witnesses, Richard White gives us the first full account of Jane Stanford's murder and its cover-up. Against a backdrop of the city's machine politics, rogue policing, tong wars, and heated newspaper rivalries, White's search for the murderer draws us into Jane Stanford's imperious household and the academic enmities of the university. Although Stanford officials claimed that no one could have wanted to murder Jane, we meet several people who had the motives and the opportunity to do so. One of these, we discover, also had the means.

The true story of James Howard Snook, Theora Hix, and one of the most shocking crimes of the 1920s. In the sweltering summer of 1929, the people of Columbus, Ohio, were enthralled by the story of Dr. James Howard Snook—an Ohio State University veterinary professor and Olympic gold medal-winning pistol shooter who was put on trial for the murder of his twenty-four-year-old lover, a medical student. This riveting account reveals how Snook was captured and interrogated, including his gory confession of Theora Hix's death. During the trial, the details of the illicit love affair were so salacious that newspapers could only hint about what really led to the coed's murder and the professor's ultimate punishment. This is the first full account of this astonishing story, from scandalous beginning to tragic end.

On Nov. 28, 1969, Betsy Aardsma, a 22-year-old graduate student in English at Penn State, was stabbed to death in the stacks of Pattee Library at the university's main campus in State College. For more than forty years, her murder went unsolved, though detectives with the Pennsylvania State Police and local citizens worked tirelessly to find her killer. The mystery was eventually solved—after the death of the murderer. This book will reveal the story behind what has been a scary mystery for generations of Penn State students and explain why the Pennsylvania State Police failed to bring her killer to justice. More than a simple true crime story, the book weaves together the events, culture, and attitudes of the late 1960s, memorializing Betsy Aardsma and her time and place in history.

"The Murder Book offers broader and deeper coverage of the theoretical explanations for homicide than competitors. Discussions of the extraordinary murders featured in the popular texts on the market are included while providing a more extensive and realistic view of homicide by also examining the more ordinary homicides that occur every day. Unlike existing texts, The Murder Book also present details about how homicide cases are worked and how they are dealt with in the courts, thus providing a more complete treatment of homicide than is currently available, appealing to those who want a broader and more rigorous academic treatment of homicide that goes beyond what students learn through popular media presentations on murder"--

An Organ of Murder explores the origins of both popular and elite theories of criminality in the nineteenth-century United States, focusing in particular on the influence of phrenology. In the United States, phrenology shaped the production of medico-legal knowledge around crime, the treatment of the criminal within prisons and in public discourse, and sociocultural expectations about the causes of crime. The criminal was phrenology's ideal research and demonstration subject, and the courtroom and the prison were essential spaces for the staging of scientific expertise. In particular, phrenology constructed ways of looking as well as a language for identifying, understanding, and analyzing criminals and their actions. This work traces the long-lasting influence of phrenological visual culture and language in American culture, law, and medicine, as well as the practical uses of phrenology in courts, prisons, and daily life.

An analysis of American murder narratives across a number of genres including novels, sociological texts and true crime accounts.

From the author of Wittgenstein's Poker and Would You Kill the Fat Man?, the story of an extraordinary group of philosophers during a dark chapter in Europe's history On June 22, 1936, the philosopher Moritz Schlick was on his way to deliver a lecture at the University of Vienna when Johann Nelböck, a deranged former student of Schlick's, shot him dead on the university steps. Some Austrian newspapers defended the madman, while Nelböck himself argued in court that his onetime teacher had promoted a treacherous Jewish philosophy. David Edmonds traces the rise and fall of the Vienna Circle—an influential group of brilliant thinkers led by Schlick—and of a philosophical movement that sought to do away with metaphysics and pseudoscience in a city darkened by fascism, anti-Semitism, and unreason. The Vienna Circle's members included Otto Neurath, Rudolf Carnap, and the eccentric logician Kurt Gödel. On its fringes were two other philosophical titans of the twentieth century, Ludwig Wittgenstein and Karl Popper. The Circle championed the philosophy of logical empiricism, which held that only two types of propositions have cognitive meaning, those that can be verified through experience and those that are analytically true. For a time, it was the most fashionable movement in philosophy. Yet by the outbreak of World War II, Schlick's group had disbanded and almost all its members had fled. Edmonds reveals why the Austro-fascists and the Nazis saw their philosophy as such a threat. The Murder of Professor Schlick paints an unforgettable portrait of the Vienna Circle and its members while weaving an enthralling narrative set against the backdrop of economic catastrophe and rising extremism in Hitler's Europe.

The twins set off on holiday and en route pick up Scott Culver. Meanwhile Tom, Elizabeth's boyfriend, discovers her face on the FBI's most wanted list.
