With thanks to airquiz, I managed to pass all my PPL exams first time, and the exam questions felt a lot easier than I was already use to. I've actually found that there is quite a lot of content on airquiz which isn't covered either in PPL Tutor or in the Pooley's books (for example, the extent to which a pilot of a private aircraft can make his own repairs).

The Federal Aviation Administration (FAA) has published the Private Pilot - Airplane Airman Certification Standards (ACS) document to communicate the aeronautical knowledge, risk management, and flight proficiency standards for the private pilot certification in the airplane category, single-engine land and sea; and multiengine land and sea classes. This ACS incorporates and supersedes the previous Private Pilot Practical Test Standards for Airplane, FAA-S-8081-14. The FAA views the ACS as the foundation of its transition to a more integrated and systematic approach to airman certification. The ACS is part of the safety management system (SMS) framework that the FAA uses to mitigate risks

associated with airman certification training and testing. Specifically, the ACS, associated guidance, and test question components of the airman certification system are constructed around the four functional components of an SMS: Safety Policy that defines and describes aeronautical knowledge, flight proficiency, and risk management as integrated components of the airman certification system; Safety Risk Management processes through which internal and external stakeholders identify and evaluate regulatory changes, safety recommendations and other factors that require modification of airman testing and training materials; Safety Assurance processes to ensure the prompt and appropriate incorporation of changes arising from new regulations and safety recommendations; and Safety

Promotion in the form of ongoing engagement with both external stakeholders (e.g., the aviation training industry) and FAA policy divisions. The FAA has developed this ACS and its associated guidance in collaboration with a diverse group of aviation training experts. The goal is to drive a systematic approach to all components of the airman certification system, including knowledge test question development and conduct of the practical test. The FAA acknowledges and appreciates the many hours that these aviation experts have contributed toward this goal. This level of collaboration, a hallmark of a robust safety culture, strengthens and enhances aviation safety at every level of the airman certification system.

checkride with FAA examiners. Using a question-and-answer format, this indispensable tool lists the questions most likely to be asked by examiners and provides succinct, ready responses. Instructors rate the oral exam guide series as excellent resources for students in both planning for what to expect during the airplane checkride, and mastering the subject matter. This guide is also great preparation for flight reviews, aircraft transitions, and as general refresher material. This twelfth edition has been updated to comply with the Airman Certification Standards (ACS) and recent FAA publications, rules and procedures. It covers all the subjects a Private Pilot candidate will be tested on during checkrides and review flights. limitations, airplane systems, cross-country flight planning, night operations, aeromedical factors, and SBT (Scenario-Based Training.) Scenario-based questions have become an integral part of the Practical Test and an important tool in an examiner's toolbox. Student responses to these "open-ended" questions demonstrate an understanding of the big picture and convey the practical application of what's important and why. Noted SBT expert, Arlynn McMahon (2009 National Flight Instructor of the Year, and recipient of the 2010 NATA Award for Excellence in Pilot Training Award), provides insight into these scenario-based questions and will be invaluable to students preparing for their checkride.
