Optimize the Role of the Project Sponsor The project sponsor is critical to project success, yet it is a role that is often assigned to a member of the organization with little knowledge or training in project management practices. This creates challenges not only for the sponsor but for the project manager. The organization suffers too if key members of the project team are not fully utilized, as valuable resources are wasted. In *Strategies for Project Sponsorship*, the authors address this challenge from all three vantage points—that of the project manager, the project sponsor, and the organization. Based on their practical experience and solid research, they offer practical methods that project managers can use to optimize the participation of the sponsor. They also offer clear and straightforward guidance for project sponsors on how to properly execute their duties and contribute to project success. Executives will gain valuable perspective on the organization's projects and key players. From defining the roles and responsibilities of the project sponsor to suggesting specific practices that maximize the working relationship between the sponsor and project manager, this book is the ultimate guide. Examples from real-world sponsor experiences, as well as tips, techniques, and tools, enhance its applicability and practicality. This book should be given to every newly assigned project sponsor, read and referred to by every project manager, and on the desk of every organizational executive as a reference.

Research(CER) is designed to fill this knowledge gap by assisting patients and healthcare providers across diverse settings in making more informed decisions. In this 2009 report, the Institute of Medicine's Committee on Comparative Effectiveness Research Prioritization establishes a working definition of CER, develops a priority list of research topics, and identifies the necessary requirements to support a robust and sustainable CER enterprise. As part of the 2009 American Recovery and Reinvestment Act, Congress appropriated \$1.1 billion in federal support of CER, reflecting legislators' belief that better decisions about the use of health care could improve the public's health and reduce the cost of care. The Committee on Comparative Effectiveness Research Prioritization was successful in preparing a list 100 top priority CER topics and 10 recommendations for best practices in the field.
