BOARD BOOK. Pages feature bright illustrations of favourite tractors and trains, with simple text to listen to or read. Each book has an integral sound button for little fingers to press, so that children can hear sounds like the tractor’s engine or the train’s whistle. Encourage speaking skills, help to develop handeye coordination and build early vocabulary.

Larry Pardey is accepted as one of the master craftsman of the wooden-boat building world. He and his wife, Lin, have built and repaired many boats including two strong, handsome cruising cutters and sailed twice around the world in them. This impressive book shows the process of constructing a boat hull with extensive photographs and drawings and includes ample time-saving procedures. From financial and time planning, lofting, floors and framing, selection of materials, planking and spiling, design considerations, to deck beams, man-hour norms and details critical to wooden boat construction, this volume serves as th emost comprehensive guid a potential builder could ever use. Reders will also appreciate the discussions of how to select from numerous construction methods and materials, how to set up the shop and tips for sharpening and making your own tools. The new appendix on proper adhesive selection is "must" reading.

Lin and Larry Pardey have now been cruising on board their own boats, racing, delivering, and repairing other people’s boats for more than 44 years. After west-to-east and east-to-west circumnavigations, and voyages to more than 75 countries, they have a breadth of knowledge that few other boating authors possess. Most of the voyaging has been done on an earn-as-you-go budget that could be well within the reach of the majority of those whose dream is to set sail. Their motto? "Go small, go simple, but go now!" The Pardeys' strengths are neatly symbolized by the boats they have built. Each one is romantically traditional, with swooping sheerlines, and is completely dependent on the wind. And yet each boat carries the best, strongest, and most seamanlike gear. Like their vessels, the Pardeys' writings are founded on a marriage of the spirit of romantic adventure and the practical, up-to-date seamanship that keeps them and their boats safe. This revised and expanded third edition of a cruising classic includes 10 completely new chapters with such advice as: sixteen ways to encourage your lover (partner) to share your dream; strategies for turning sudden engine failure into a minor incident; choosing safety equipment; repairing rigging at sea. All of the original chapters have been updated to ensure that the information will be helpful for everyone who dreams of cruising—whether now or soon. The Capable Cruiser is a logical extension of the Pardeys' The Self-Sufficient Sailor, with more emphasis on seamanship underway, including careful analysis of extreme anchoring situations and solutions for mitigating them. Underlying each and every chapter is the warmth and encouragement that spurred Herb McCormick, former editor of Cruising World magazine, to label Lin and Larry Pardey “the enablers.”

A fun and exciting guide to the world of living out at sea. This book will teach you what you need to know inorder to live safely, economically and cheaply when spending moths at sea. If nothing else, this book will send you chasing for your dreams, whether it be to take an adventure at sea or just about anything else. This is the first of a four-book series which begins on the journey that Lin and Larry Pardey began 34 years ago in their self-built 24-foot engineless cutter, Seraffyn. In this journey, we explore places such as Mexico, Central America, the Caribbean, and the Islands of the Atlantic ocean. Throughout the book, we learn about people and customs, we learn about the tricks of boating, we learn about surviaval. This 25th anniversary edition includes a new forward, new appendixes, and a color photo album showing Lin, Larry and the Serraffyn during those months at sea.

This book is dedicated to Aristid Lindenmayer on the occasion of his 60th birthday on November 17, 1985. Contributions range from mathematics and theoretical computer science to biology. Aristid Lindenmayer introduced language-theoretic models for developmental biology in 1968. Since then the models have been cus tomarily referred to as L systems. Lindenmayer's invention turned out to be one of the most beautiful examples of interdisciplinary science: work in one area (developmental biology) induces most fruitful ideas in other areas (theory of formal languages and automata, and formal power series). As evident from the articles and references in this book, the in terest in L systems is continuously growing. For newcomers the first contact with L systems usually happens via the most basic class of L systems, namely, DOL systems. Here "0" stands for zero context between developing cells. It has been a major typographical problem that printers are unable to distinguish between 0 (zero) and 0 (oh). Thus, DOL was almost always printed with "oh" rather than "zero", and also pronounced that way. However, this misunderstanding turned out to be very fortunate. The wrong spelling "DOL" of "DOL" could be read in the suggestive way: DO L. Indeed, hundreds of researchers have followed this suggestion. Some of them appear as contributors to this book. Of the many who could not contribute, we in particular regret the absence of A. Ehrenfeucht, G. Herman and H.A. Maurer whose influence in the theory of L systems has been most significant.

This sumptuously illustrated volume analyzes artists’ representations of angels and demons and heaven and hell from the Judeo-Christian tradition and describes how these artistic portrayals evolved over time. As with other books in the Guide to Imagery series, the goal of this volume is to help contemporary art enthusiasts decode the symbolic meanings in the great masterworks of Western Art. The first chapter traces the development of images of the Creation and the Afterworld from descriptions of them in the Scriptures through their evolution in later literary and philosophical works. The following two chapters examine artists’ depictions of the two paths that humans may take, the path of evil or the path of salvation, and the punishments or rewards found on each. A chapter on the Judgment Day and the end of the world explores portrayals of the mysterious worlds between life and death and in the afterlife. Finally, the author looks at images of angelic and demonic beings themselves and how they came to be portrayed with the physical attributes--wings, halos, horns, and cloven hooves--with which we are now so familiar. Thoroughly researched by and expert in the field of iconography, Angels and Demons in Art will delight readers with an interest in art or religious symbolism.

In the future world of Scorch, America is run by a "corporacracy." Three conglomerates have taken control not by force but by manipulating common beliefs and values through the media, and particularly by playing on Americans’ fears of Big Brother. Consumerism and privatization have run amok in this landscape of flashing screens and subtle brainwashing, a world where even city streets and public schools are run by big business. This is a darkly comic first novel of a dystopian future, with echoes of 1984 and Brave New World.

June 11, 1940 – where is Winston Churchill!?

Follow two abolitionists who fought one of the most shockingly persistent evils of the world: human trafficking and sexual exploitation of slaves. Told in alternating chapters from perspectives spanning more than a century apart, read the riveting 19th century first-hand account of Harriet Jacobs and the modern-day eyewitness account of Timothy Ballard. Harriet Jacobs was an African-American, born into slavery in North Carolina in 1813. She thwarted the sexual advances of her master for years until she escaped and hid in the attic crawl space of her grandmother’s house for seven years before escaping north to freedom. She published an autobiography of her life, Incidents in the Life of a Slave Girl, which was one of the first open discussions about sexual abuse endured by slave women. She was an active abolitionist, associated with Frederick Douglass, and, during the Civil War, used her celebrity to raise money for black refugees. After the war, she worked to improve the conditions of newly-freed slaves. As a former Special Agent for the Department of Homeland Security who has seen the horrors and carnage of war, Timothy Ballard founded a modern-day "underground railroad" which has rescued hundreds of children from being fully enslaved, abused, or trafficked in third-world countries. His story includes the rescue and his eventual adoption of two young siblings--Mia and Marky, who were born in Haiti. Section 2 features the lives of five abolitionists, a mix of heroes from past to present, who call us to action and teach us life lessons based on their own experiences: Harriet Tubman--The "Conductor"; Abraham Lincoln--the "Great Emancipator"; Little Mia--the sister who saved her little brother; Guesno Mardy--the Haitian father who lost his son to slave traders; and Harriet Jacobs--a teacher for us all.

Tuiga, Mariquita, Cambria, Shamrock, Eleonora, Zaca, Moonbeam, Lulworth, Sunshine, Partridge, Altair, Nan, Marilee, and Bona Fide: these are the majestic sailing yachts of legend presented in this lavishly illustrated volume. Featuring dazzling photographs by the renowned yachtsman and photojournalist Gilles Martin-Raget, this stunning tribute captures the original splendor of these fourteen recently restored boats. Readers feel as though they are traversing the globe with the crew as great action photography depicts the palpable excitement on board. From Buzzards Bay, Massachusetts to the Great Barrier Reef, Martin-Raget's striking scenes range from leisurely cruises past the villages of St. Tropez to close encounters between racing yachts during international regattas. Below deck, his images of the boats' impressive interiors offer a peak at the luxury accommodations. Complimenting the photographs, detailed architectural drawings reveal the structures of these fabled vessels. In this unprecedented documentation of these boats' storied past and recent transformations, author Francois Chevalier recounts each yacht's compelling, and often eccentric, history, from construction and restoration to anecdotal tales of regattas won and lost. In addition to covering racing records and sailing itineraries, there are also tales about such celebrities as Grace Kelly aboard Moonbeam on her honeymoon and Zaca's forays as a marine biology research vessel. Those interested in boat restoration will find the step-by-step details of each yacht's renovation highly informative. A glossary of sailing terms rounds out the coverage. With a foreword and lively captions by ESPN Sailing Analyst Gary Jobson, this book is essential for sailing enthusiasts, boat lovers, or anyone who enjoys viewing an elegant yacht on the open sea. Classic Yachts captures the spirit and beauty of a glorious tradition and offers a breathtaking celebration of an epic pastime.
