A discussion guide is a set of questions/tasks/topics that you, the researcher, wish to walk a research participant through in order to reach your learning objectives. They will facilitate the...

**Creating an effective discussion guide for your User Research**

Discussion guides are useful for both the researcher and the client as both parties are able to clarify the amount of emphasis on each topic area and the flow of the interview. Often an essential part of the research process, discussion guides also work in building up researcher/client rapport, as the discussion guide acts as a reference tool and a solid foundation for the interview or group discussion to build upon, increasing confidence and trust for both parties.

The objectives of your discussion section should include the following:1. Reiterate the Research Problem/State the Major Findings. Briefly reiterate the research problem or problems you are investigating and the methods you used to investigate them, then move quickly to describe the major findings of the study.

**8 The Discussion - Research Guides at University of** ...

Also known as a topic guide, this is an outline of key issues and areas of questioning used to guide a qualitative interview or group discussion. Such guides vary greatly in level of detail and in how flexibly they are applied - some use 'discussion guide' to refer to a more structured and 'topic guide' to refer to a looser, more open form. In the 'cognitive' model of qualitative market research a very detailed guide may be applied consistently to every group or interview, in the 'conative' ...

**Discussion guide - Association for Qualitative Research (AQR)**

In a nutshell, your Discussion fulfills the promise you made to readers in your Introduction. At the beginning of your paper, you tell us why we should care about your research. You then guide us through a series of intricate images and graphs that capture all the relevant data you collected during your research.

**Step-by-step guide to critiquing research, Part 1** ...

Revised on October 13, 2020. The discussion chapter is where you delve into the meaning, importance and relevance of your results. It should focus on explaining and evaluating what you found, showing how it relates to your literature review and research questions, and making an argument in support of your overall conclusion. There are many different ways to write this section, but you can focus your discussion around four key elements:

**How to Write a Discussion Section | Checklist and Examples**

Discussion A good article will restate the results again in plain language and state whether they are consistent with the expected findings. Do the authors overstate their findings? That is, if the results were inconsistent or small effect sizes, are the authors making too much of them?

**Discussion - Research Guides at Queen's University**

The theoretical framework you describe should guide your study throughout the paper. Be sure to always connect theory to the review of pertinent literature and to explain in the discussion part of your paper how the theoretical framework you chose supports analysis of the research problem or, if appropriate, how the theoretical framework was found to be inadequate in explaining the phenomenon you were investigating.

The Study Guides are research-informed and peer-evaluated, covering all the key aspects of each topic. We also have guides aimed at particular student groups, including new undergraduates, postgraduates, mature and international students, and those with dyslexia and other specific learning difficulties.

**Guides & tutorials - University of Reading**

All research proposals are designed to persuade someone — such as a funding body, educational institution, or supervisor — that your project is worthwhile. How long is a research proposal? The length of a research proposal varies dramatically.

**How to Write a Research Proposal | Guide and Template**

A research method is a strategy used to implement that plan. Research design and methods are different but closely related, because good research design ensures that the data you obtain will help you answer your research question more effectively. Which research method should I choose? It depends on your research goal.

**Research Design & Method - Research Methods Guide** ...

Research questions help writers focus their research by providing a path through the research and writing process. The specificity of a well-developed research question helps writers avoid the “all-about” paper and work toward supporting a specific, arguable thesis. Steps to developing a research question: Choose an interesting general topic.
