design is generally performed by network designers, engineers, IT administrators and other related staff. It is done before the implementation of a network infrastructure.

What is Network Design? - Definition from Techopedia

Download Ebook Simulation In Computer

Simulation is a prediction of reality and it does not generate an optimal solution. Takes a long time: It takes a long time to set up and test a simulation model. This is because simulation takes a lot of data to be input and making the environment also counts.
