With civilization in an era of fragmentation and transition, a few thinkers paint a new vision with insight and clarity. Prominent among them, Paul Von Ward in Solarian Legacy brings order to intellectual and experienced chaos, grounding humans in a truer sense of their history, capacities, and potential destiny. Paul Von Ward draws not only on the discoveries of cutting edge science, but compels us to recall the lost wisdom of ages past. He makes sense of such disparate phenomena as mysterious prehistoric artifacts and modern UFOs, the healing power of prayer and quantum mechanics, gaps in the geological record and in conventional science, mental aberrations and parapsychology, and dreams and the physical senses, all in the context of a unified and universal consciousness. His analyses offer plausible explanations for societal violence, personal illnesses, institutional stagnation, and technological breakdowns

Children of a Living Universe is a call to action unlike any other you may have encountered. According to cultural historian and cosmologist Paul Von Ward, the time has come for human beings to reassess just about everything we believe about our ancestry and global past. Drawing upon forgotten prehistory, clues from the world's esoteric traditions, and new research in consciousness, Von Ward asserts we are more powerful beings than either science or religion has led us to believe. He exhorts us to embrace a bold, new model of human existence, one that explains our celestial origins, multidimensional capacities, and destiny as conscious co-creators of a self-learning and self-correcting universe. With insight and clarity, Von Ward envisions that the discovery of our true legacy will inspire a global renaissance of inner knowing and unprecedented social progress. He sees humanity assuming its place as part of a universal community of conscious beings, and fulfilling our potential to serve as galactic leaders. Children of a Living Universe is a brilliant guide to this new and essential process in human spiritual evolution. Previously published as Our Solarian Legacy.

Constructing a global currency based on the generation of knowledge can better tap abundant energy sources and the productive power of the human spirit. By exploring new worlds, nations can finally achieve an active peace on Earth. Homeplanet Defense calls for preempting multiple threats to the human family through space-based strategies, aided by the vast resources and expertise in all military industrial complexes - transformed into explorative information networks. This work adds to an ongoing paradigm shift toward a new realism in the practice and study of international relations, to protect the global chessboard multilaterally rather than to dominate it unilaterally or through alliances. This small book is packed dense with new ideas and concepts. It is best read slowly, one section at a time whether one is already a leader of positive change, a student or a global citizen who is discontent with the way the world works now.

This book is an articulate, well-researched, intelligent compilation of new and ancient data that explores the implications of the extraterrestrial origins of the human race. The primary stories of our origins (religious versions/Darwinism) are called into question when held against scientific evidence and recorded histories of many cultures. Among Von Ward's startling conclusions are: The universe is self-manifesting, self-directing, and self-learning Everything that is (including the human race) is a manifestation of the universal consciousness Intelligent human life is much older than is popularly believed Human consciousness mirrors that of the universe's creators Science and technologies of a millennia ago were as advanced as they are today Our consciousness is not limited to the world of the five senses With insight and clarity, Von Ward envisions that discovery of our true legacy will inspire a global renaissance of inner knowing and unprecedented social progress. Beyond earthly evolution, he sees humanity assuming its place as a part of a universal community of conscious beings, and fulfilling our potential to serve as galactic leaders. This is a brilliant guide to this new and essential process in human

spiritual evolution.

This is the only book by Cleve Backster himself, describing 36 years of research in biocommunication, observed electrical responses in plant life and other living organisms. All life forms have the capability of responding to one another, from plants and bacteria to foods and animal cells. Most amazing is his work with human leukocytes. These discoveries have opened up a new paradigm in science, ecology and healing.

This comprehensive resource features up-to-date bibliographical, biographical and contact information for approximately 20,000 living authors worldwide who have at least one English publication. Entries typically include name, pseudonyms, addresses, citizenship, birth date, specialization, career information and a bibliography. Contact information includes e-mail addresses where available.
