Two Englishmen on a crime spree break American laws! Stupid, unreasonable, and long-forgotten laws!but laws just the same. In 1787 the wise framers of the U.S. Constitution laid out the laws of the land. Since then, things have gone awry, and a few laws even the far-sighted framers couldn't have imagined have worked their way onto the books in towns and cities across the country. Did you know that in the United States it's illegal to: Ⓜ Fish while wearing pajamas in Chicago, Illinois? Ⓜ Enter a theater within three hours of eating garlic in Indianapolis? Ⓜ Offer cigarettes or whiskey to zoo animals in New Jersey? Ⓜ Fall asleep in a cheese factory in South Dakota? What inspired a perfectly law abiding, mild-mannered Englishman to come to America and take on the law? He simply wanted to know why. How did these 'lonly in America!' laws come to be, do the police know they exist, and would they care if he broke them? So with his best mate, Bateman, by his side!and at the ready should bail be required!ⓂSmith set out to break the law in the United States. Part road trip, part chronicle of the absurdity of human behavior, part search for the ultimate in roadkill, You Can Get Arrested for That follows Smith and Bateman on their not quite Bonnie and Clyde adventure.

A New York Times Notable Book of 2020 A Bloomberg Best Non-Fiction Book of 2020 A Behavioral Scientist Notable Book of 2020 A Human Behavior & Evolution Society Must-Read Popular Evolution Book of 2020 A bold, epic account of how the co-evolution of psychology and culture created the peculiar Western mind that has profoundly shaped the modern world. Perhaps you are WEIRD: raised in a society that is Western, Educated, Industrialized, Rich, and Democratic. If so, you're rather psychologically peculiar. Unlike much of the world today, and most people who have ever lived, WEIRD people are highly individualistic, self-obsessed, control-oriented, nonconformist, and analytical. They focus on themselves!their attributes, accomplishments, and aspirations!over their relationships and social roles. How did WEIRD populations become so psychologically distinct? What role did these psychological differences play in the industrial revolution and the global expansion of Europe during the last few centuries? In The WEIRDest People in the World, Joseph Henrich draws on cutting-edge research in anthropology, psychology, economics, and evolutionary biology to explore these questions and more. He illuminates the origins and evolution of family structures, marriage, and religion, and the profound impact these cultural transformations had on human psychology. Mapping these shifts through ancient history and late antiquity, Henrich reveals that the most fundamental institutions of kinship and marriage changed dramatically under pressure from the Roman Catholic Church. It was these changes that gave rise to the WEIRD psychology that would coevolve with impersonal markets, occupational specialization, and free competition!laying the foundation for the modern world. Provocative and engaging in both its broad scope and its surprising details, The WEIRDest People in the World explores how culture, institutions, and psychology shape one another, and explains what this means for both our most personal sense of who we are as individuals and also the large-scale social, political, and economic forces that drive human history. Includes black-and-white illustrations.

This book presents the main findings of a comparative qualitative survey conducted in France, Germany, Italy, and Poland. Ordinary citizens from very different social backgrounds and professions were asked a range of open-ended questions, allowing them to express themselves freely. There have been few qualitative surveys on ordinary citizens views of European integration, and none on this scale. The resulting picture is very different from the self-evident assumptions of many current studies on European opinions. The book stresses the great diversity, ambiguity, and complexity of European attitudes. It emphasises the causal impact of formal education, political interest and involvement, individual everyday exposures to 'European' realities, and the role of collective national experiences of European integration and national history. This book: is the first qualitative survey among ordinary from all social strata across Europe that explores perceptions and judgments on 'Europe' and the EU; explains the underlying logic of why Europe and European integration are such a far reality to most citizens; explores how most citizens are poorly - but unequally - informed about and interested in European subjects; investigates how citizens are able to express perceptions of 'Europe' by using a series of analogies and comparisons often linked to their daily experiences; identifies the complex range of issues that influence our perceptions, and the irresolute, fragmentary, mixed, and sometimes contradictory nature of these opinions.
