Bilateral coordination is the ability to use both sides of the body at the same time in a controlled and organized manner. This can mean using both sides to do the same thing, as in pushing a rolling pin, using alternating movements such as when walking, or using different movements on each side, such as when cutting with

bilateral coordination

Neuroscientists have found that the two sides of the brain work together to perform a wide variety of tasks and the two sides communicate through the corpus callosum. In a study of over 1000 participants by the University of Utah, it was revealed that while activity was sometimes higher on one side or the other in certain critical regions, on average both sides of the brain were essentially equal in their activity.

Why Using Both Sides of our Brain is Important

see both sides (of something) To understand and respect both opinions or positions in an argument, conflict, or disagreement, without necessarily favoring or agreeing with either one. People are so blinded by their political affiliations that they usually fail to see both sides of any given issue.
