nations as models of how to address the contemporary global problems of poverty, conflict, and environmental degradation.

Bodley trenchantly critiques the most pressing global mega-problems, such as unsustainable growth, resource depletion,

global warming, and poverty and conflict, and shows how anthropology makes it possible to find solutions.

This introductory text introduces basic concepts in cultural anthropology by comparing cultures of increasing scale and focusing on specific

universal issues throughout human history. It uniquely challenges students to consider the big questions about the nature of cultural systems.

Material culture studies is an interdisciplinary field

that examines the relationships between people and their things: the production, history, preservation, and interpretation of objects. It draws on theory and practice from disciplines in the social sciences and humanities, such as anthropology, archaeology, history, and museum studies.

Written by leading international scholars, this Handbook provides a comprehensive view of developments, methodologies and theories. It is divided into five broad themes, embracing both classic and emerging areas of research in the field. Chapters outline

This book offers a historically sweeping yet detailed view of world-systemic migration as a racialized process. Since the early expansion of the world-system, the movement of people has been its central process. Not only have managers of capital moved to

Get Free Victims

direct profitable
expansion; they have
also forced, cajoled or
encouraged workers
to move in order to
extract, grow, refine,
manufacture and
transport materials
and commodities. The
book offers historical
cases that show that
migration introduces
and deepens racial
dominance in all

Get Free Victims

zones of the world-system. This often forces indigenous and imported slaves or bonded labor to extract, process and move raw materials. Yet it also often creates a contradiction between capital's need to direct labor to where it enables profitability, and the desires of

Get Free

Victims

large sections of dominant populations to keep subordinate people of color marginalized and separate. Case studies reveal how core states are concurrently users and blockers of migrant labor. Key examples are Mexican migrants in the United States,

Get Free Victims

both historically and in contemporary society. The United States even promotes of an image of a society that welcomes the immigrant—while policy realities often quite different.

Nonetheless, the volume ends with a vision of a future whereby communities from below, both

Get Free

Victims

activists and people simply following their communal interests, can come together to create a society that overcomes racism. Its final chapter is a hopeful call by Immanuel Wallerstein for people to make small changes that, together, can bring real about real, revolutionary change.
