Sound financial strength of a bank is the assurance & guarantee, not only to its depositors but is equally important for the shareholders, employees, stockholders and for the entire economy as well. Efforts have been made, from time to time, to evaluate the financial position of each bank to manage it efficiently and successfully. In this study, an effort has been made to assess the financial performance of the two major banking sectors i.e. Commercial banking sector and Islamic banking sector, operating in Pakistan. This assessment has been done by using CAMEL Parameters, which are Capital adequacy, Asset quality, Management capability, Earnings & profitability and Liquidity. CAMEL model is the most recent model of financial analysis. The objective of this research was to know about the financial health of the commercial banks vs. Islamic banks of Pakistan in the last 3 years (2007-09), to investigate and examine the financial performance of the banks under study, to carry out those factors which have led to the present financial performance and to propose measures, on the basis of the results of the study, to improve further the financial performance of the banks.

This paper is analyzing the financial performance of selected Commercial Banks in Malaysia during the period of 2004-2008, during the financial crisis. It examines the impact of financial crisis to banks financial performance by employing the financial ratio analysis. The results indicate that the selected commercial banks does not affected much by the financial crisis, it can be prove by finding results shows a significantly increase in the financial performance of commercial banks in Malaysia occurred during world economic turbulence. The paper is important to analyze the performances of commercial bank in Malaysia because the commercial banks are lending of economic growth in Malaysia. Thus the financial performances of commercial banks are positively reflected by the economic changes for the previous economic downturn but in the case of commercial banks in Malaysia, they are a slightly different. It shows that the financial crisis does not hit much to banking sector. This is proved by the statement issued by The Association of Banks in Malaysia (ABM) said that Malaysia's banking sector remains strong and well capitalized despite the turmoil in the global financial markets.

The financial statements of banks differ very much from those of non-banks. The assets and liabilities are mostly financial based, and the equity ratio is far lower than the equity ratios of industrial companies. Banking supervision has a big influence on the financial statements too. Recent years have shown the risks which can evolve from banks, but normal instruments of financial statement analysis are not sufficient to analyse banks and locate these risks: different methods are needed. This book, by experienced bank analyst Thomas Padberg, provides analysts and investors with the tools to analyse bank financial statements, find problems in bank finances, and assess the risks of banks. Examples with real bank financial data are used to show readers the step-by-step methods to follow when looking at bank financial statements. The book covers: - The specific accounting rules that apply to banks - How to analyse bank segment reporting - The ratios to use when analysing bank financial statements - How to analyse bank profit and loss accounts - Equity analysis and stock analysis of banks This is an essential guide for all analysts and serious investors who need to analyse bank financial statements.

Introduction to Business covers the scope and sequence of most introductory business courses. The book provides detailed explanations in the context of core themes such as customer satisfaction, ethics, entrepreneurship, global business, and managing change. Introduction to Business includes hundreds of current business examples from a range of industries and geographic locations, which feature a variety of individuals. The outcome is a balanced approach to the theory and application of business concepts, with attention to the knowledge and skills necessary for student success in this course and beyond.

The purpose of Analyzing Financial Statements is to provide commercial lenders with the knowledge and skills they need to analyzine and interpret financial information. The book emphasizes interpreting the information, not just calculating it.

Bachelor Thesis from the year 2011 in the subject Business economics - Accounting and Taxes, grade: 50%, Oxford Brookes University, language: English, abstract: The aim of this research is to analyze the business and financial performance of Ryanair by focusing on financial and non-financial performance such as financial management, business strategy, future prospects and ways of achieving its objectives in its competitive environment from a stakeholder point of view. In 1985, Ryanair was set up by the Ryan family with a share capital of just £1, and a staff of 25. The company launched its first route in July with daily flights from Waterford in the southeast of Ireland to London Gatwick. Since then, the company has grown considerably and became one of Europe's largest low-fare airlines.

The updated, real-world guide to interpreting and unpacking GAAP and non-GAAP financial statements In Financial Statement Analysis, 5th Edition, leading investment authority Martin Fridson returns with Fernando Alvarez to provide the analytical framework you need to scrutinize financial statements, whether you're evaluating a company's stock price or determining valuations for a merger or acquisition. Rather than taking financial statements at face value, you'll learn practical and straightforward analytical techniques for uncovering the reality behind the numbers. This fully revised and up-to-date 5th Edition offers fresh information that will help you to evaluate financial statements in today's volatile markets and uncertain economy. The declining connection between GAAP earnings and stock prices has introduced a need to discriminate between instructive and misleading non-GAAP alternatives. This book integrates the alternatives and provides guidance on understanding the extent to which non-GAAP reports, particularly from US companies, may be biased. Understanding financial statements is an essential skill for business professionals and investors. Most books on the subject proceed from the questionable premise that companies' objective is to present a true picture of their financial condition. A safer assumption is that they seek to minimize the cost of raising capital by portraying themselves in the most favorable light possible. Financial Statement Analysis teaches readers the tricks that companies use to mislead, so readers can more clearly interpret statements. Learn how to read and understand financial statements prepared according to GAAP and non-GAAP standards Compare CFROI, EVA, Valens, and other non-GAAP methodologies to determine how accurate companies' reports are Improve your business decision making, stock valuations, or merger and acquisition strategy Develop the essential skill of quickly and accurately gathering and assessing information from financial statements of all types Professional analysts, investors, and students will gain valuable knowledge from this updated edition of the popular guide. Filled with real-life examples and expert advice, Financial Statement Analysis, 5th Edition, will help you interpret and unpack financial statements.

The last few years have been challenging for clothing retailers in the United Kingdom. A number of struggling clothing retailers have experienced a decline in revenues as customers reined in their spending because of the uncertainty posed by Brexit and prioritization of wealth management to more fiscal conservative measures. Primark, however, seems to have bucked this trend. Primark's owner, Associated British Food, reported revenues of GBP 7,477 million and adjusted operating profit of GBP 843 million for the fiscal year ending in 20X5. To evaluate Primark's financial position in relation to its competitors, this case study is compiled using financial data from 20X1 to 20X5. This case study employs the latest financial performance and historical data to evaluate and critically analyze the financial performance of Primark in comparison to three of its competitors in the UK: Next, Marks & Spencer, and New Look. The case will focus on the key issues facing Primark in comparison to its competitors and use both financial ratios and distress models to evaluate performance. For comparative purposes, five years of data from the four retailers were chosen to identify trends and patterns in the industry. Students are asked to consider whether Primark is a good company to invest in and where the company will rank financially within its sector.

For one-semester, undergraduate-level courses in Financial Statement Analysis. Filling an important gap in business education, this text stresses the relationship between business and financial disclosures. It emphasizes business context and research in financial statement analysis. As an introduction to the discipline, students learn how to analyze financial statements by actively engaging in the research process, especially on the Internet, and understanding environmental influences on financial disclosures. In doing so, this book develops critical thinking, research, and analytical skills, as well as a technical understanding of the subject matter.
